

TESTIMONIAL

CORE ELMS is the leading experiential education software for schools of pharmacy

Since beginning 14 years ago, CORE has maintained a 100% pharmacy client retention rate.

“Everything is user friendly and can be filtered to meet our specific needs.”

“We have been with CORE since 2009, and since then **we have gotten a lot of positive feedback from our students, administrators, and preceptors**. We chose CORE because of all the tools they offer to manage experiential education. Not only does the software provide everything we need, but **the CORE client success team does so much of the heavy lifting**. They walked us through the transition and implementation of CORE very easily, and they are always available to answer whatever questions we have.

Overall, **using CORE has simplified** the time it used to take us to create and find information. Now everything is user-friendly and can be filtered to our specific needs.

The CORE development team is always adding and enhancing features based on feedback and requests. **They really take our comments and questions into consideration**. When new features are rolled out, the development team will notify us and always provide clear instructions, descriptions, and screenshots. If needed, our client success representative will make sure to schedule time with us to review anything new and ensure we feel confident in how to utilize it best.

Our experience with the CORE team has been amazing. Their dedication, commitment, and knowledge is outstanding.”
