

TESTIMONIAL

Regis University Implements CORE ELMS

Regis University School of Pharmacy switched to the CORE ELMS application to manage their experiential learning component.

“*Everything is streamlined & our experiential program has improved.*”

“Switching to CORE was an easy decision – it had the best overall value, and provided exactly what we were looking for in terms of support. Before CORE, we would spend a lot of time training ourselves, our students, and our preceptors. We were often frustrated with how long it took to get everyone on board. **Since switching, the CORE team has been with us every step of the way.** They provided us with personalized training so that we really felt comfortable when rolling it out to our students, faculty, and preceptors. Everything is streamlined and our experiential program has improved since switching to CORE.”

*Megan Leeds, Pharm.D., BCACP
Director of Experiential Education,
Associate Professor, Pharmacy Practice
Regis University School of Pharmacy*

“Implementing CORE was a no-brainer for us. We were really excited about so many of the functions that it offered. The tools, the resources, the support, the interface – everything. I think the most challenging part of running a great experiential program is ensuring that there is a very easy platform that both preceptors and students can access. CORE easily accomplishes all of this for us. **Utilizing CORE has also allowed me to save more time.** Now I can spend that time working with more preceptors and creating more opportunities for our students, and that has been a great benefit.”

*Christine Feltman, Pharm.D.
Assistant Director of Experiential Education,
Assistant Professor, Pharmacy Practice
Regis University School of Pharmacy*
