Hosted on the RXoutcome Platform	✓

CORE CompMS is a Competency Management System for detailed student competency documentation and tracking, curriculum mapping, and course evaluation.

"

We are just beginning to use the CORE suite. Our students and preceptors like its straight-forward format. Support has been wonderful and their team is always willing to listen to our concerns and help determine the best way to implement and use the software to meet our needs."

Rebecca Malone, PharmD
Coordinator, Experiential Education
University of Arizona

Is your current technology platform properly supporting your institution's competency-based education programs and initiatives? If not, contact a CORE representative today for a demonstration and pricing.
