CORE ePortfolios are Electronic Credential Presentation Portfolios designed to manage and present an individual's educational, professional, and experiential achievements.

"

MyCred is a wonderful tool for any student who wishes to present a greater perspective of who they are and what they have to offer - well beyond a standard resume. When used as a means to separate oneself from the pack, an interviewee can gain the upper hand by leveraging their portfolio as a topic of conversation with interviewing employers."

David DiLustro
PharmD Candidate
University of Rhode Island

Is your current technology platform providing students with a competitive edge regarding accomplishment presentation to potential employers? If not, contact a CORE representative today for a demonstration and pricing.
